### **How I Earned 50,000 dollars in one year from my cell phone**

Dear reader,

My name is Gavriel Hani.

I am glad you have chosen to read my e-book.

I hope you can get the same benefits from your cellular phone as I did from my cell phone after reading this e-books and using the several ideas here that you can apply any day to earn money from your cell phone.

When I first purchased my third generation cell phone, I was amazed at all the new features it had to offer me. But after a while using the cell phone mainly for talking with my spouse and family, I noticed that I pay large sums of money to cellular companies that were taking money out of my pocket and out of my income. These sums kept increasing with every passing month.

One day my wife approached me and told me I need to cut on my cell phone expenses since they were high. I set down and tried to figure a way how to cut my cell phone expenses.

I set down and after about two hours of going over different ways to cut the expenses I realised that talking less would surely decrease the expenses, but I thought why should I talk less.

After all that was the reason I bought that cell phone in the first place.

So I changed my thinking and thought to myself. What if, instead of cutting down the expenses I could find ways to make money from that cell phone to cover my expenses?

At first I was sure that I can come up with some way of earning about 20-50 dollars a month from my cellular phone, but when I made a list of all the possible ways of making money from my cell phone, I was amazed to find a long list of new possibilities.

I sat with my new list of opportunities and thought to myself, is it really possible to use each one of these ideas of making money out of this small amazing plastic gadget?

At first I was a bit skeptical, but nevertheless I decided to give it a try.

As the days, weeks and months passed I earned more and more. I started to notice that I was making large sums of passive income. At the end of one year I set down and calculated the total income made from my cellular phone. I was staggered from the amount calculated.

I got of the table, got me a glass of cold water, got back to the table and looked at my calculator. No, I thought at first, couldn't be. And began calculating all the income again.

Once again the answer from the calculator showed the same amount of income.

Fifty Thousand Dollars of income made in one year! Wow...

I still couldn't believe my eyes. So I checked again, and again the calculator showed the sum of \$50,000.

Now I realised that I was on to something. I never expected to earn that much money at first. But hey, if I made that amount of money, than anyone can.

When my wife returned home from shopping, I called her and showed her the total income from the project she thought would never work. She always thought that money can only be made working for salary.

Seeing the income statement, she first stood there amazed and a few moments later got the keys of the car and was on her way out.

"Where are you going?" I asked her.

"I am going to get me one of these cell phones, like you've got, and then I'm gonna make me \$50,000 or more...", then she got into her car and drove off.

When she got back I gave her my plans which I wrote on a couple of A4 papers on how to make money from the cell phone and she began to earn extra cash on her fre time.

She loved it, since more cash ment more money. And more money ment more shopping for her, our children and me of course.

We had more money so we could afford taking vacations from time to time without having to take loans as we did in the past, and we had no worries about where to get the extra money since there were planty of ways to create that extra income.

Now my dear readers, I would like to share these ideas with you and help you get the best from your cell phone.

If you apply only some of the methods I will revill in this e-book you will be amazed as I was just how money flows into your life and into your wallet with little effort.

Would you like to discover these secrets???

Yes!!!!

Then turn over to the next page and lets begin making extra income!

## **25 ways to increase your income from your cellular phone**

### **1. Telemarketing.**

In today's fast growing economy, lots of companies are looking to expand their business. They use telemarketing services to either call a prospect to get orders from prospects.

You can open any newspaper or look at any wanted site on the internet and find lots of companies who are looking for people to do telemarketing.

The amazing stuff is that today you don't have to actually be in the company to do that. You can do it from your home, either making telemarketing calls for a company or have them transfer calls to your cell phone to take orders from potential customer (such as an selling ad in news papers, etc). You can enter the orders in their website and get paid well from these companies.

## 2. Survey

Lots of companies today conduct survey's today and that is a fun way of making some extra income. You can find these companies and conduct survey's for them at your spare time

The fun part about it is that you can do it while driving to work or from work using a car cellular speaker and a recorder so that you don't have to write the answer while driving.

If you take the bus or the train to work you can do it there as well.

Memorise the questions and you can do the survey's while driving.

Did you know that most of us spend up 2 to 6 hours on the road each day. These hours are just waisted with no return on them. Why not make extra income on the road.

You can find lots of companies in the newspapers or via the internet who are looking for such services and part time workers.
